SUMMARY

Self-motivated Laravel Developer with practical experience in developing web applications and handling backend logic using Laravel. Skilled in frontend technologies including React.js, jQuery, AJAX, JavaScript, and Node.js, along with API integration and database management. Able to work independently as well as collaboratively in a team environment. Quick learner with a passion for building efficient, scalable, and user-friendly applications.

EXPERIENCE

Full Stack Laravel Developer

Planicsdev infotech LLP.

9 Month

- Worked on real-time web applications on laravel and Mysql
- Developed to maintain Backend functionality and API.

PROJECT

HIRECHEF MARKETPLACE PLATFORM

- Developed a full-stack chef booking marketplace platform for customers to hire professional chefs for home events and dining experiences.
- Implemented role-based authentication and dashboards for Customers, Chefs, and Admin.
- Built chef onboarding and profile management features including cuisines, pricing, experience, availability, and verification details.
- Developed booking and scheduling system with real-time booking status management and secure Stripe payment integration.
- Implemented advance payment, remaining balance payment, refund handling, and cancellation workflows based on platform policies.
- Integrated AI-powered chatbot support using Laravel AI SDK and Flowise for customer assistance and platform guidance.

EMKAY LPO

- Implemented role-based authentication and permission management for Admin and Staff users.
- Built modules for handling LPO (Local Purchase Orders), BOQ (Bill of Quantity), inventory tracking, and supplier management.
- Developed scheduling and task management features to streamline daily operations and project execution.
- Integrated payment tracking, quotation handling, and data history management functionalities.
- Implemented email notifications and status update systems for improved workflow communication.
- Built responsive frontend interfaces using Laravel Blade, jQuery, AJAX, JavaScript, and Tailwind CSS.
- Optimized database queries and improved application performance for handling large operational records.
- Collaborated on creating a scalable and user-friendly system to improve operational efficiency and data management.

EMKAY HRMS

- Built an employee management system to handle employee records.
- Implemented features like leave management, permission approval workflows, and role-based access.
- Integrated email and notification system for automation.
- Ensured secure access so users can view only their authorized data.

AI Chatbot System

- Developed and implemented an AI-powered chatbot using Laravel AI SDK and also with Flowise Ai.
- Designed the chatbot to handle user queries and provide real-time responses.
- Integrated the chatbot with the system for better user interaction and support.
- Integrated AI-powered chatbot support using Laravel AI SDK and Flowise for customer assistance and platform guidance.

SKILLS
